AI Business Startup Prompts

INTRODUCTION

If you've signed up for our courses and tutorials you have access to our free AI tool that walks you through building a business and getting answers in minutes versus days, weeks or months. The **Access Code** for the AI Tool is **METHOD2026**. Use this code to access the tool and follow along during the training.

WELCOME! START SIMPLE, NOT PERFECT

If you've been feeling overwhelmed by all the business advice online, you are not alone.

Many new entrepreneurs spend weeks (or even months) researching, watching videos, comparing tools, and trying to figure out the "perfect" business idea before they ever get started. This guide was created to help you move forward with clarity, confidence, and a simple plan you can actually follow.

This is NOT about perfection.

You do NOT need:

- A website to get started
- Expensive tools or software
- Advanced tech skills
- A huge social media following

- A perfect business idea
- Everything figured out today

You simply need a starting point.

Inside this guide, you'll use beginner-friendly AI prompts and simple exercises to help you:

- Discover business ideas based on your interests, experience, and skills
- Choose a simple product or service you could realistically start with
- Create a basic promotion strategy using social media
- Build a simple action plan without tech overwhelm

You can either:

- Copy and paste the prompts into your favorite AI tool, or
- Use our beginner-friendly Simple Start Business System GPT for guided support and accountability

The goal is not to build a massive business overnight.

The goal is to help you build momentum.

Building Momentum

This guide is designed to introduce you to a simpler way of starting an online business using what we call the [Same Day Seller](#) Method — a beginner-friendly approach focused on simple offers, low-cost tools, AI support, and realistic action steps that help you start moving forward quickly without overcomplicating the process.

As you work through the prompts, remember:
You are not trying to create the “perfect” business today.

You are creating your **FIRST** version.

And that first version could become the beginning of something much bigger than you realize.

Start Selling Without a Website

This training helps you turn your skills and knowledge into simple income, without tech hassles, monthly fees or long drawn out training sessions. To learn more take a look at our [Same Day Seller](#) Training.

Prompts For Brand New Entrepreneurs and Your Access Code

👉 [Watch This Video](#) for Instructions on How to Get Started:

Use either of these options to get ideas and a plan you can use to start a business online.

Copy and paste the prompts in each section into your favorite AI tool to get ideas and create a process you can use to earn money. Enter each section one by one for the best results.

Use our free Simple Start Business System [Custom GPT](#) that walks you through starting a business from scratch with an action plan and accountability prompts to get you started. The **access code** for the GPT is **METHOD2026**

SECTION 1: Connect Interests → Income Ideas

Prompt 1: Skills & Interests Inventory

I want to start a simple online business, but I'm brand new. Ask me a few thoughtful questions to help uncover my hobbies, skills, interests, past experiences, and things people already ask me for help with. Keep the questions simple and beginner-friendly. Please ask questions about things that I might want to avoid when starting my business. I would also like to outline things that drain my energy when I perform related tasks.

Prompt 2: Translate Interests into Business Ideas

Based on my previous answers, suggest 5 realistic, profitable business ideas I could start online. These ideas should be free or require an investment of no more than \$100 to get started.

For each idea, explain why it's a good fit for me, not just whether it's profitable.

Keep everything beginner-friendly and low-pressure.

Prompt 3: Reality Check (Without Discouragement)

For each of the ideas you suggested, explain:

- The target audience. Who this could help
 - The niche and industry it serves
 - What problem it solves (in simple terms)
 - One easy way a beginner could get started
- Avoid advanced strategies or tech-heavy advice.
-

SECTION 2: Choose One Direction (No Overthinking Allowed!)

Prompt 4: Narrow It Down Gently

Help me choose **ONE** business idea to start with — not forever, just for now.

Ask me 3–5 simple questions to help me decide based on:

- What feels easiest
 - What fits my current time and energy. I have _____ hours each week to devote to my business.
 - And my monthly budget is _____
 - What feels interesting (not intimidating)
-

Prompt 5: Permission to Start Small

I'm afraid of choosing the “wrong” idea.
Reassure me and explain why choosing one clear direction is better than waiting for the perfect one.
Keep the tone calm, encouraging, and practical.

SECTION 3: Name What You're Building

(Turns vague ideas into something real)

Prompt 6: Simple Business Naming Help

Help me come up with a simple, flexible name for my business or project.

I don't need it to be perfect or final — just clear and usable.
Use my chosen idea and keep the names beginner-friendly.

Prompt 7: Describe It in Plain English

Help me describe my business in one or two simple sentences that I could say out loud without feeling awkward.

Avoid buzzwords or hype.

Make it sound natural and easy to understand.

SECTION 4: Outline a Simple First Offer

(Builds confidence by showing it doesn't have to be complicated)

Prompt 8: First Offer Brainstorm

Based on my business idea, suggest 3 simple offers I could start with.

These should be beginner-friendly (examples: guides, services, templates, curated resources, or simple products).

Explain why each one is realistic for someone just starting out.

Prompt 9: Choose the Easiest Offer

Help me choose the easiest offer to start with right now.

Consider:

- Low tech
- Low pressure
- Something I could explain simply

Then outline what this offer might include at a high level.

SECTION 5: Build My Simple Business System

Prompt 10: Let's Implement Your Offer

This prompt will pull everything you've discussed so far, together into a plan you can use to move forward. Copy and paste the following prompt and all the steps below into your AI tool:

You are a beginner-friendly business coach helping me create a simple, low-cost system to start making money from my product or offer.

Your goal is to use the answers I've given you so far to guide me step-by-step by asking me **ONE** of the following questions at a time (do not overwhelm me with multiple

questions at once). Wait for my response before moving to the next question.

Keep everything simple, encouraging, and easy to understand (6th-grade reading level). Avoid complicated strategies, tech-heavy solutions, or expensive tools.

At the end, create a clear, personalized action plan I can start within 24 hours using free or low-cost tools (under \$100).

Here's how to guide me:

STEP 1: Help me clarify my offer

Ask me:

- What product, service, or idea do I want to make money from
- Who does it help
- What problem does it solves

STEP 2: Help me identify my comfort zone

Ask me:

- If I prefer writing, talking, or designing
- If I want to show my face or stay behind the scenes
- How many hours per week I can commit

STEP 3: Help me choose how to build an audience

Ask me:

- Which platform feels easiest (Pinterest, YouTube, Instagram, email, blog)

- If I prefer fast visibility or slow, steady growth

STEP 4: Help me define my budget and tools

Ask me:

- My starting budget (\$0, under \$50, under \$100)
- If I prefer free tools only or low-cost tools

STEP 5: Help me choose a simple system

Guide me to choose **ONE**:

- A single landing page
- Social media + link in bio
- A simple blog + product page
- A marketplace (Etsy, Gumroad, Payhip)

STEP 6: Help me identify my selling style

Ask me if I prefer:

- Teaching
- Showing results
- Storytelling
- Direct selling

FINAL STEP: Create my simple plan

Based on my answers, give me:

- **ONE** main platform to focus on
- **ONE** type of content to create
- A simple way to sell my offer
- A beginner-friendly tool stack (free or under \$100)
- A 3-step weekly action plan
- **ONE** action I can take in the next 24 hours

Keep the tone supportive, simple, and motivating. Help me feel confident and ready to take action without overthinking.

SECTION 6: Build Confidence + Reduce Freeze

Prompt 11: Reframe the Fear

I feel overwhelmed and worried I'm not ready.

Help me reframe this feeling in a supportive way and remind me what is already working in my favor.

Keep it practical and encouraging, not motivational fluff.

Prompt 12: Next 3 Gentle Steps

Based on everything we've discussed, give me my next 3 small, doable steps.

These steps should feel realistic for a beginner and focus on progress, not perfection.

SECTION 7: Momentum Builder (Optional Weekly Plan)

Prompt 13: Weekly Focus Reset

I'm building a business slowly and intentionally.

Help me decide what ONE thing I should focus on this week to move forward without overwhelm.

Prompt 14: Content Planning Strategy

I will need a way to build and keep the momentum going so that I can help my audience, and sell my products consistently and intentionally. Please help me with a daily routine that I can follow based on the things we've talked about that will help me be consistent with my audience, and build trust through consistent content that holds the attention of my customers. Please ask any clarifying questions that you need to help me (1) create a social media content plan, and (2) daily routine that helps me build my library of valuable knowledge based products, helping me work smart, earning money passively.

Your Experience Is More Valuable Than You Think

Most people look at their resume and only see job titles.

But hidden inside your experience are skills, systems, knowledge, and problem-solving abilities that could potentially become products, services, digital downloads, content, templates, tutorials, or even passive income streams.

The things you've spent years learning in your career may already contain the foundation for a business.

For example:

- Administrative experience could become productivity templates or organization systems

- Customer service experience could become communication guides or training resources
- Creative hobbies could become digital products or tutorials
- Technical skills could become beginner-friendly guides or simple services
- Industry experience could become educational content, checklists, planners, or consulting offers

Many people already have valuable knowledge — they just haven't learned how to package it yet.

One of the biggest mindset shifts you can make is this:

Instead of only looking for your next job opportunity, start looking for opportunities to create assets that can earn money alongside your job.

This does **NOT** mean quitting your 9-to-5 tomorrow.

It means creating additional options.

When you begin creating digital products, simple services, affiliate content, templates, guides, or educational resources, you are building digital assets that can continue working for you over time.

The goal is not to replace your income overnight.

The goal is to slowly create multiple ways to earn money so that your financial future is not tied to only **one** source of income.

That's one of the core ideas behind the Same Day Seller:

Helping overwhelmed beginners turn their existing knowledge, interests, and skills into simple income opportunities without complicated tech or expensive startup costs.

👉 Watch This Video

To help you get started, we've included a [video walkthrough](#) that shows you how to take your resume, skills, and past experience and use AI tools like ChatGPT to uncover:

- Business ideas
- Product opportunities
- Services you could offer
- Digital products you could create
- Content topics you could teach
- Skills people may already be searching for online

You may be much closer to starting than you think.

Sometimes the fastest way to begin is not learning something completely new.

It's learning how to use what you already know in a different way.

Start Selling Without a Website

Now that you have a product and a plan, it's time to get to work, turning your skills and knowledge into simple income, with our [Same Day Seller](#) Training.
